

## InspectionXpert® and Verisurf® Announce Partnership

### *Integration Designed to Accelerate First Article Inspections will be Previewed at IMTS*

**Raleigh NC – September 4, 2012** – Verisurf Software, Inc. and InspectionXpert Corporation today announced they are partnering to provide integrated InspectionXpert and Verisurf functionality designed to accelerate the process of completing first article inspections. The new partnership provides quality inspectors with an integrated solution to streamline their inspection process that combines the value of both 3D model based and 2D drawing based inspection information.

“InspectionXpert’s automated ballooning and inspection reporting combined with the powerful inspection automation capabilities in Verisurf makes creating first articles and other inspection reports even faster for quality inspectors,” explains Jeff Cope, President and CTO of InspectionXpert. “Our integration addresses critical bottlenecks in quality inspection so manufacturers can increase throughput in their delivery of products to their customers.”

A preview of the integration will be shown at IMTS 2012 at the InspectionXpert booth E-3019 and the Verisurf booth E-3327. The InspectionXpert product line includes integration with popular CAD programs including Solid Edge, CATIA, SolidWorks and Pro/ENGINEER, and versions that work with any PDF and TIFF files. The Verisurf product line includes the ability to import all popular 3D CAD models and standard 3D formats such as IGES and STEP, create and edit model associated GD&T and perform inspection directly to the 3D model. Thousands of companies use InspectionXpert and Verisurf to achieve time savings of 50 to 90% in their inspection and quality documentation process.

“Verisurf’s connection to popular Coordinate Measuring Machines (CMM) and real time comparison to 3D CAD models combined with InspectionXpert’s drawing ballooning and AS9102 and PPAP reporting will automate both 2D drawing based and 3D model based inspection processes,” states Ernie Husted, President and CEO of Verisurf. “This partnership and integration is the best in 2D and 3D inspection and will save manufacturers significant time and money producing first article inspection reports.”

#### **Verisurf Software, Inc.**

Verisurf Software, Inc. is an advanced three dimensional measurement solutions company committed to delivering advanced computer-aided inspection and reverse engineering solutions. Verisurf software helps manufacturers of all sizes and industries produce higher quality products in less time and at a lower cost with automated, Model-Based Inspection processes. For more information, visit the Verisurf website at [www.verisurf.com](http://www.verisurf.com).

#### **About InspectionXpert Corporation**

Since 2004, InspectionXpert Corporation has developed productivity enhancement tools for manufacturing and quality inspection. InspectionXpert software automates ballooning and inspection reporting for AS9102, First Article, PPAP and production inspections. InspectionXpert Corporation serves the Aerospace, Automotive, Defense, Energy, Oil and Gas, and Medical Device industries and their supply chains including contract manufacturers and job shops. For more information visit [AS9102 Software](#) or [PPAP Software](#).
