

New Verisurf X6 Metrology Software Released

Verisurf Software, Inc. has announced the newest release of Verisurf X6. The new release is loaded with innovative software features that enhance in-process, portable inspection, tool building, CATIA interoperability, and 3D scanning and reverse engineering. The new release will be demonstrated at IMTS 2012 in the Verisurf Booth [E-3327](#).

“Verisurf customers use our software with many brands of 3D scanners and generate massive point clouds for manufacturing inspection, part verification and reverse engineering. Verisurf customers also import very large CAD models and perform real time model-based inspection” Says Jacob Hockett, Verisurf Product Manager. “it is our goal with this new Windows 7 64 bit release to vastly improve our customers productivity when working with these very large files. “

Verisurf X6 release has many new features and enhancements including:

- Enhanced Windows 64 bit performance for working with massive 3D scanner point clouds, and very large CAD assemblies.
- New report manager with customizable HTML, Excel, XML, PDF, document encryption, document verification checksum and AS9102 first article inspection report generator.
- New CATIA V5 R22 translation validation support.
- New metrology device interfaces extending Verisurf’s standard metrology platform leadership.

Please contact us at www.verisurf.com/contact.php to receive a complete features and enhancement list. Customers with current software maintenance should contact their Verisurf Sales Manager to receive download and installation instructions.

Verisurf Software, Inc.

Verisurf Software, Inc. is an advanced three dimensional measurement solutions company committed to delivering advanced computer-aided inspection and reverse engineering solutions. Verisurf software helps manufacturers produce higher quality products in less time and at a lower cost with automated, Model-Based Inspection processes. For more information, visit the Verisurf website at www.verisurf.com.
